Endeavor Natural Gas, LP sets single pad production record from the San Miguel sand with recent Serena Ranch completions

Endeavor announces results from the four well Serena Ranch 80 pad. The horizontal wells were landed in the San Miguel sand on Endeavor's 17,000 acre Serena Ranch lease in Maverick County, Texas. The wells had a combined 30 day IP of 2,120 BOE per day (66% oil) from a total lateral length of 16,703 ft at an average true vertical depth of 3,400 ft.
